INVENTORY MANAGEMENT SYSTEM

UI/UX Mockup Screen List

A screen-planning guide for a Tracepos-style inventory and point-of-sale platform

Purpose	Plan the screens required for inventory, sales, purchases, reporting and administration.
Suggested approach	Design the core MVP workflows first, then expand into advanced modules.
Product model	Multi-business SaaS: each business has separate inventory, transactions and staff access.

How to use this guide

Use each numbered item as a candidate Figma screen or screen state. Related states may be combined into one frame with variants, modals, or interaction flows. The full list is a planning catalogue, not a requirement to build every screen in the first release.

1. Proposed system structure

The platform is organized around six main areas:

Dashboard: Sales summary, stock alerts, revenue and business activity.

Inventory: Products, categories, stock levels, variants and stock movements.

Sales & POS: Record sales, process payments, issue receipts and manage returns.

Purchases & Suppliers: Purchase orders, goods received, supplier records and invoices.

Business & Administration: Customers, staff, branches, permissions, settings and reports.

Platform Administration: Manage businesses, subscriptions, usage and system operations.

2. Complete mockup screen list

The sections below follow the proposed product structure and preserve the screen names in the guide.

A. Public website and onboarding

1. Homepage / Landing Page
2. Features Overview
3. Pricing Plans
4. How It Works
5. Industry Solutions
6. About the Platform
7. Contact Us
8. Help Centre
9. Frequently Asked Questions
10. Terms of Service
11. Privacy Policy

B. Authentication and account access

12. Sign Up
13. Login
14. Forgot Password
15. Reset Password
16. Email Verification
17. Verification Success
18. Business Type Selection
19. Create Business Profile
20. Business Setup Wizard
21. First-Time User Welcome
22. Join Existing Business
23. Accept Staff Invitation

C. Business dashboard

24. Main Dashboard
25. Sales Overview
26. Inventory Overview
27. Low-Stock Alerts
28. Out-of-Stock Products
29. Recent Transactions
30. Top-Selling Products

31. Revenue and Profit Summary
32. Pending Purchase Orders
33. Recent Stock Movements
34. Notifications Centre
35. Dashboard Date and Branch Filters

D. Product and inventory management

36. Product List
37. Add New Product
38. Product Details
39. Edit Product
40. Delete / Archive Product Confirmation
41. Product Categories
42. Add / Edit Category
43. Product Brands
44. Product Variants and Attributes
45. Barcode and SKU Management
46. Product Image Upload
47. Product Pricing
48. Cost Price and Selling Price
49. Product Tax Configuration
50. Product Batch and Expiry Management
51. Product Serial Number Tracking
52. Product Import from CSV / Excel
53. Product Export
54. Bulk Product Editing
55. Product Search and Filters

E. Stock control and stock movements

56. Current Stock Levels
57. Stock Details by Product
58. Stock Adjustment
59. Stock Adjustment Review
60. Stock Adjustment History
61. Stock-In Recording
62. Stock-Out Recording
63. Damaged / Expired Stock
64. Stock Transfer Between Branches
65. Stock Transfer Details
66. Stock Transfer Approval
67. Stock Transfer History
68. Stock Reservation
69. Stock Reconciliation
70. Physical Stock Count
71. Stock Count Variance
72. Stock Movement Ledger
73. Reorder Level Configuration
74. Reorder Suggestions
75. Inventory Valuation

F. Point of sale (POS)

76. POS Main Screen
77. Product Search / Barcode Scanner
78. Add Products to Cart
79. Cart Review
80. Edit Cart Quantity
81. Apply Discount
82. Select Customer
83. Add New Customer During Sale
84. Select Payment Method
85. Cash Payment
86. Bank Transfer Payment
87. Card / Online Payment
88. Split Payment
89. Payment Processing
90. Payment Successful
91. Payment Failed
92. Sale Confirmation
93. Receipt Preview
94. Print / Download Receipt
95. Hold Sale
96. Resume Held Sale
97. Cancel Sale
98. Refund / Return Processing
99. Exchange Products
100. POS Transaction History
101. Open Cash Register
102. Close Cash Register
103. Cash Drawer Reconciliation
104. End-of-Day Sales Summary

G. Sales management

105. Sales List
106. Create New Sale
107. Sale Details
108. Edit Sale Details (where permitted)
109. Sales Invoice
110. Invoice Preview
111. Invoice Payment Status
112. Partial Payment Tracking
113. Outstanding Balances
114. Sales Returns
115. Refund History
116. Cancelled Sales
117. Sales by Staff Member
118. Sales by Branch
119. Sales Export

H. Purchases and suppliers

120. Supplier List

121. Add New Supplier
122. Supplier Details
123. Edit Supplier
124. Supplier Transaction History
125. Purchase Order List
126. Create Purchase Order
127. Purchase Order Details
128. Edit Purchase Order
129. Purchase Order Approval
130. Send Purchase Order to Supplier
131. Record Goods Received
132. Partial Goods Receipt
133. Goods Receipt Discrepancy
134. Purchase Invoice
135. Supplier Payment
136. Supplier Outstanding Balances
137. Purchase Returns
138. Purchase History

I. Customer management

139. Customer List
140. Add New Customer
141. Customer Details
142. Edit Customer
143. Customer Purchase History
144. Customer Transaction Details
145. Customer Outstanding Balance
146. Customer Credit Limit
147. Customer Groups / Segments
148. Customer Import / Export
149. Customer Activity Timeline

J. Expenses and financial tracking

150. Expense Dashboard
151. Expense List
152. Record Expense
153. Expense Categories
154. Expense Details
155. Edit / Delete Expense
156. Income and Expense Summary
157. Cash Flow Summary
158. Payment History
159. Tax Summary
160. Profit and Loss Summary

K. Reports and analytics

161. Reports Dashboard
162. Sales Report
163. Product Performance Report
164. Inventory Report
165. Stock Movement Report

166. Low-Stock Report
167. Out-of-Stock Report
168. Inventory Valuation Report
169. Purchase Report
170. Supplier Report
171. Customer Report
172. Profit and Loss Report
173. Tax Report
174. Staff Performance Report
175. Branch Performance Report
176. Payment Method Report
177. Refund and Returns Report
178. Cash Register Report
179. Custom Report Builder
180. Export Report to PDF / Excel

L. Multi-branch and warehouse management

181. Branch List
182. Add New Branch
183. Branch Details
184. Edit Branch
185. Warehouse List
186. Add / Edit Warehouse
187. Warehouse Stock Overview
188. Branch Stock Overview
189. Transfer Stock Between Locations
190. Branch-Level Pricing
191. Branch-Level User Assignment
192. Branch Comparison Dashboard

M. Staff, roles and permissions

193. Staff List
194. Invite Staff Member
195. Staff Profile
196. Edit Staff Details
197. Assign Role
198. Role and Permission Management
199. Permission Matrix
200. Staff Activity Log
201. Staff Sales Performance
202. Suspend / Deactivate Staff
203. Login History

N. Notifications and activity logs

204. Notification Centre
205. Notification Details
206. Low-Stock Notification
207. Purchase Order Notification
208. Stock Transfer Notification
209. Payment Notification
210. Expiry Alert Notification

211. Email Notification Settings
212. Notification Preferences
213. Audit Log
214. Audit Event Details

O. Business settings and integrations

215. Business Profile
216. Edit Business Information
217. Business Logo and Branding
218. Currency and Regional Settings
219. Tax Settings
220. Receipt and Invoice Settings
221. Barcode Label Settings
222. Inventory Settings
223. Sales and POS Settings
224. Branch Settings
225. Payment Gateway Configuration
226. Accounting Integration Settings
227. E-commerce Integration Settings
228. API Keys and Webhooks
229. Data Import Settings
230. Data Export and Backup
231. Security Settings
232. Session and Device Management

P. Subscription and billing

233. Subscription Overview
234. Pricing Plan Selection
235. Upgrade Plan
236. Downgrade Plan
237. Subscription Checkout
238. Payment Confirmation
239. Billing History
240. Invoices and Receipts
241. Usage and Plan Limits
242. Subscription Renewal
243. Cancel Subscription
244. Subscription Expired / Restricted Account

Q. Platform administrator dashboard

245. Platform Admin Login
246. Platform Admin Dashboard
247. Business / Tenant List
248. Business Details
249. Create / Edit Business
250. Business Subscription Management
251. Plan and Pricing Management
252. Platform User Management
253. Platform Usage Analytics
254. System-Wide Sales and Activity Overview
255. Integration Monitoring

256. API and Webhook Logs
257. System Audit Log
258. Platform Configuration

R. Support and system screens

259. Support Dashboard
260. Submit Support Request
261. Support Request Details
262. Help Centre / Knowledge Base
263. 404 — Page Not Found
264. 403 — Unauthorized Access
265. Session Expired
266. Network Connection Lost
267. Offline Mode
268. Data Synchronization Status
269. Empty State Screens
270. Search No Results
271. Loading States
272. Error / Retry Screen
273. Maintenance Page

3. Recommended MVP screens

Start with the following core screens. You can expand the design after the key inventory workflow works end-to-end.

Account and business setup

- Sign Up
- Login
- Create Business Profile
- Business Setup Wizard

Dashboard and products

- Main Dashboard
- Product List
- Add New Product
- Product Details
- Product Categories

Inventory control

- Current Stock Levels
- Stock Adjustment
- Stock Movement Ledger
- Low-Stock Alerts
- Stock Count

Sales

- POS Main Screen
- Cart Review
- Payment Method Selection
- Sale Confirmation
- Receipt Preview
- Sales History

Purchases and contacts

- Supplier List
- Purchase Order List
- Record Goods Received
- Customer List

Reports and administration

- Sales Report
- Inventory Report
- Staff List
- Role and Permission Management
- Business Settings

4. Important design rules

Multi-business support: Each business must have its own products, stock, sales, customers and staff permissions.

Stock accuracy: Sales should reduce stock; receiving purchases should increase it; returns and adjustments should update it according to the transaction.

Auditability: Record who changed stock, what changed, when it happened and why.

Access control: A cashier should not automatically have permission to change product costs, adjust stock or view all financial reports.

Responsive design: Plan for desktop dashboards and tablet/mobile POS screens.

Integration readiness: Leave room for barcode scanners, payment providers, accounting systems and e-commerce integrations.

Suggested design order

Dashboard → Product List → Add Product → Stock Adjustment → POS → Purchase Receiving → Sales Report. These screens establish the core workflow before advanced features are added.
